## PROLE 2016 – Proceedings – Sessions and Papers

### *PROLE keynote:*

- Arnaud Gotlieb “*Constraint-Based Testing: An Emerging Trend in Software Testing*”. pp 1.

### *Sesión 2: Transformación y Optimización*

- Guillermo Viguera, Manuel Carro, Salvador Tamarit, Julio Mariño “*Towards Automatic Learning of Heuristics for Mechanical Transformations of Procedural Code*”. pp 2-16.
- Salvador Tamarit, Julio Mariño, Guillermo Viguera, Manuel Carro “*Towards a Semantics-Aware Code Transformation Toolchain for Heterogeneous Systems*”. pp 17-32
- Francisco Bueno, Jesús Correas, Fernando Sáenz-Pérez, “*Metapredicate Optimization for Datalog Queries through Program Analysis*”. pp 33-48.

### *Sesión 5: Trabajos ya publicados (I)*

- Salvador Lucas, Jose Meseguer “*Proving termination properties of conditional rewrite systems*”. pp 49.
- Marco Comini, Maria Del Mar Gallardo, Laura Titolo, Alicia Villanueva “*Abstract Analysis of Universal Properties for tccp*”. pp 50.
- Maria Del Mar Gallardo, Pedro Merino, Laura Panizo, Alberto Salmerón “*River basin management with Spin*”. pp 51.
- Clara Benac Earle, Lars-Ake Fredlund, John Hughes “*Automatic Grading of Programming Exercises using Property-Based Testing*”. pp 52.

### *Sesión 7: Lenguajes y Semánticas*

- Marisa Navarro, Fernando Orejas, Elvira Pino, Leen Lambers “*A Logic of Graph Conditions Extended with Paths*”. pp 53-67.
- Fernando Sáenz-Pérez “*Formal Relational Languages in a Deductive Setting*”. pp 68-83.
- Pascual Julián-Iranzo, Ginés Moreno, Jaime Penabad “*Fuzzy Thresholded Fixpoint Semantics*”. pp 84-98.

### *Sesión 10: Trabajos ya publicados (II)*

- Naoki Nishida, Adrián Palacios, Germán Vidal “*Reversible Term Rewriting*”. pp 99.
- María Alpuente, Demis Ballis, Francisco Frechina, Julia Sapiña “*Combining Runtime Checking and Slicing to Improve Maude Error Diagnosis*”. pp 100.

- Álvaro García-Pérez, Pablo Nogueira “*Que ningún término resoluble de lambda-valor se quede atrás*”. pp 101-102.
- Francisco Javier López-Fraguas, Manuel Montenegro, Juan Rodríguez-Hortala “*Polymorphic Types in Erlang Function Specifications*”. pp 103.

## *Sesión 11: Tutoriales y web*

- Ricardo Peña “*An Introduction to Liquid Haskell*”. pp 104-115.
- Paqui Lucio “*A Tutorial on Using Dafny to Construct Verified Software*”. pp 116-133.
- Julián Alarte, Josep Silva, David Insa “*Page-Level Webpage Menu Detection*”. pp 134-147.

## *Session 12: Lenguajes*

- Ricardo Peña, Santiago Saavedra, Jaime Sánchez-Hernández “*Processing an Intermediate Representation Written in Lisp*”. pp 148-162.
- Manuel Montenegro, Susana Nieva, Ricardo Peña, Clara Segura “*Synthesizing Invariants for Arrays (Work in Progress)*”. pp 163-177.
- Edelmira Pasarella, Maria-Esther Vidal, Cristina Zoltan “*Comparing MapReduce and Pipeline implementations for counting triangles*”. pp 178-187.

## *Session 13: Verificación y Análisis*

- Jesus M. Almendros-Jimenez, Antonio Becerra-Teron “*Testing of ATL programs from Randomly Generated ECore Test Models*”. pp 188-199.
- David Insa, Sergio Pérez, Josep Silva “*How to Construct a Suite of Program Slices*”. pp 200-214.
- Raúl Gutiérrez, Salvador Lucas, Patricio Reinoso “*A tool for the automatic generation of logical models of order-sorted first-order theories*”. pp 215-230.
